

# Adjustable engine support

Artikel Nr. MS/104-370-01-001 Artikel Nr. MS/104-450-01-001

The MS/104 is a simple and tough constructed engine support for picking up combustion engines of the middle type series.

The height setting is carried out by a fine thread screw aided by a flat spanner according to DIN3110 SW46. The clamping is carried out by a conternut SW90. The jackscrew is rotating by the height setting.

**The advantage** of this Adjustable engine support is the big slideway. For the fixing of adaptation parts and engine mounts is on the top of the jackscrew one tap hole with M16.

The base plate has two holes for screws M12.

	MS/104-370-01-001	MS/104-450-01-001
material:	steel, nickel plated	
lowest height:	370 mm	450 mm
slideway:	270 mm	350 mm
adjustable thread:	M60x4 (flat spanner DIN894 SW46)	
clamping:	conternut M60x4 SW90	
max. vertical load:	ca. 50 kN	ca. 50 kN
weight:	16 kg	19 kg
fixation:	2 holes Ø13 at base plate, M16 at the jackscrew top	
assignment:	middel type series	
equipment optional:	flat spanner DIN894 SW90, flat spanner DIN894 SW46
